WE PROVIDE FREE EDUCATIONAL PRESENTATIONS

South Sound 911 helps children learn when to call 911, how to ask for help, and what to expect when someone answers. These lessons help children feel more prepared in an emergency.

What makes the program unique is that the educators are the same people who answer 911 calls and dispatch emergency responders.

Our presentations help learners of all ages know what to do in an emergency.

TOPICS INCLUDE:

- What is an emergency and when to call or text 911
- Knowing your location / address
- Staying calm and answering the call taker's questions
- 911 is for emergencies only
- Handling an accidental call
